HISTORY

2 Men Generation

Our adventure with wood began in the 80s, when the basic materials were hard to reach. My parents were left alone with the production. The furniture in our family house was mostly wooden. Everything was made by my father and my grandfather. For me as a young boy it was a huge inspiration. My father was an authority for me - I have always dreamt of being like him. I accompanied him willingly and helped him in all the works. Thanks to him I gained knowledge and experience. Many years of observations have allowed me to work with solid wood on my own. My dream became the desire to start my own business. My dad and I run a small workshop that is constantly developing and takes care of familiar atmosphere in the company at the same time. Our products are our history. Owing to our long-standing experience, tradition and craftsmanship the entire production process of our furniture is handmade. It allows to keep the individual characteristics of wood, its perfection and beauty. We make sure that all our products are distinguished by solidity and longevity, and we use completely natural and ecological oils to impregnate them.

history is comming...

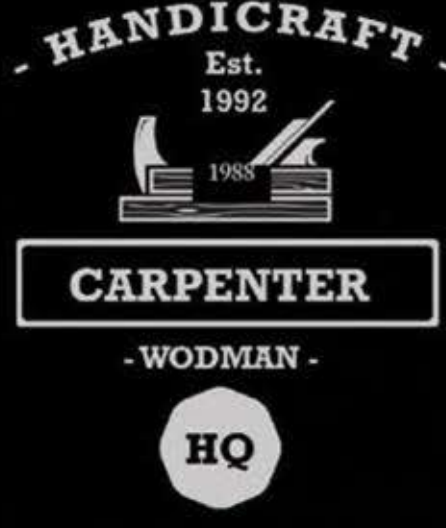
the **world.**
We are the **people.**
the **Handicraft.**

About Us

Behind every each, even the smallest product there is a person thanks to whom you can enjoy the fine quality of Handicraft products. It is their effort that transletes into not only a craft, but also a form of art. Our production process is hand-made for the most part. Handicraft offers traditional products which are not in massive production. They feature uniqueness and original design. We work on various types of wood such as oak, ash, walnut, elm and beech. Usage of wood and traditional carpenting methods makes our product unique.

Our workshop is located in Poland, about 50 km from Poznań. The entire production pro-cess, from the scratch to the finished product is here. That's where our team takes care of eve-ry even the smallest detail so that our clients can continuously enjoy the design and fine quality of the products.

The main goal that guides us is to emphasize the beauty of the natural materials. Mother Nature is the greatest creator. We want our products to show its beauty in its simplest form. Each wood jar and every knot tells a story. Our task is to convey this story to our clients. With-out unnecessary additions, which suppress and distract attention from what is most beautiful.



SecondLife
for a tree

SUSTAINABILITY

Care for the environment and sustainable development are extremely important to us. that's why we only use natural raw materials, thanks to which our products feature not only individual character, but also durability.

SECOND LIFE OF TREES

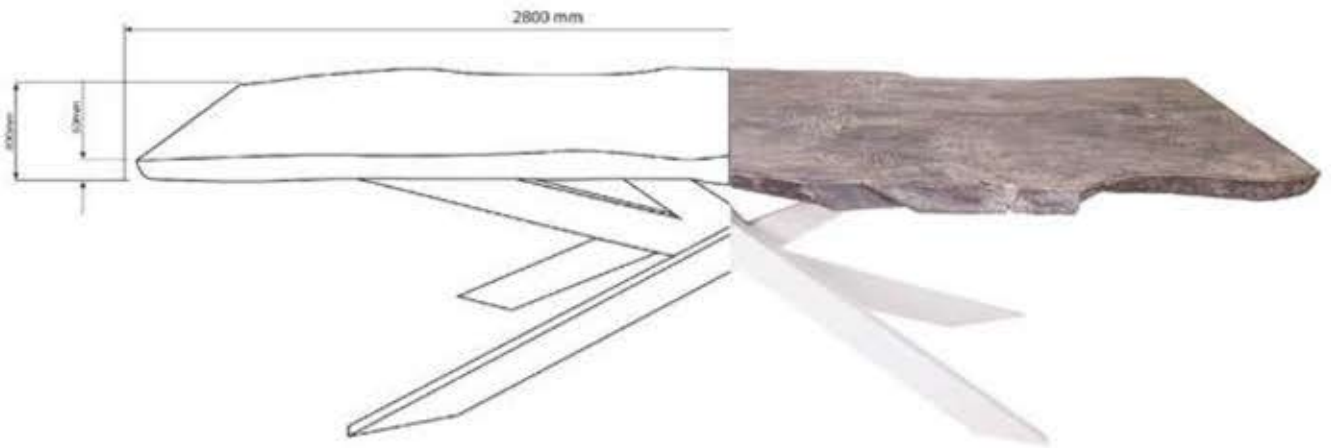
Our tables are made of 100% natural wood. In the interests of its high quality, we source raw materials only from trusted, certified suppliers. We recover wood from a tree fallings, trees chopped due to security reasons etc. Thanks to this, we can ensure that none of the trees that were used for the production were cut down only for eco-nomic purposes.

100% ECO

Our tables are protected with natural, ecological oil that is completely safe for your health and the environment.

materia

Our Design



Starting work on each product is preceded by developing its concept. It is here in our studio that all projects are developed, from the idea and detailed design to the finished product that can finally come to you.

Our team strives to make each product with own unique design and character. Our main goal is to emphasize the uniqueness and natural beauty of the materials on which we work. We want our furniture to be timeless, and our designs fit both traditional and modern interiors.

Classic
line

The tables from the "Classic" collection are, as the name indicates, timeless Handicraft bestsellers. "Classic" collection table tops are made of several boards glued together, which together form a coherent and inseparable piece. In that way we can create literally every shape of countertop. Delivered with live or stright edge up to your preference.

Classic is a table of the Handicraft collection, it feels great in home spaces as a desk, dining or living room table. The table from the classic series is a timeless product with traditions. Its simplicity and unique design impresses even the most demanding customers. Countertops are made of the most sophisticated wood and thanks to the craft production using hand tools they become a fully unique product with precisely finished details.

GlassVirtuoso

One and only

The GlassVirtuoso collection is the most elegant and modern edition out of all Handi-craft pieces. It consists of wood and epoxy resin, which combined together create a dy-namic and interesting form. In addition, the countless colours, forms and finishes gives you an infinite number of possibilities from which you can choose how to fully express-es you and your needs.

All different variations have been classified into four basic models making up the entire GlassVirtuoso collection. Let us introduce: River, Wild, Island and Detail

River. Inspiration to create the River have been drawn from a meandering river. Just as a river crosses the surface of a land, and so is the stream of resin rushes between two pieces of wood. Embedded between the raw edges reflects sunbeam.

Wild. The Wild consists of properly selected pieces of wood, arranged in a consistent composition full of dynamics and sharp shapes. The resin tames the wood wildness and creates a fine, complete form

Detail. In this model the resin fills only small parts of the table. It is a delicate accent complementing the coherent piece. The Detail is what makes the difference.

Island. A unique piece of timber with a characteristic shape and wood grain embedded in resin, which surrounds it just like the ocean surrounds the drifting islands.

GlassVirtuoso is our latest product which was created by fusing wood with liquid glass. These types of products are made to individual order and will be personalized. Many types of wood and colors of glass are available. One thing is certain – GlassVirtoso is viruos in its class, beautifully decorates your interior! This product is available in many configurations that we have on offer. However, if you have your vision for this product, please contact us! We like challenges and the only thing that limits us is our imagination.

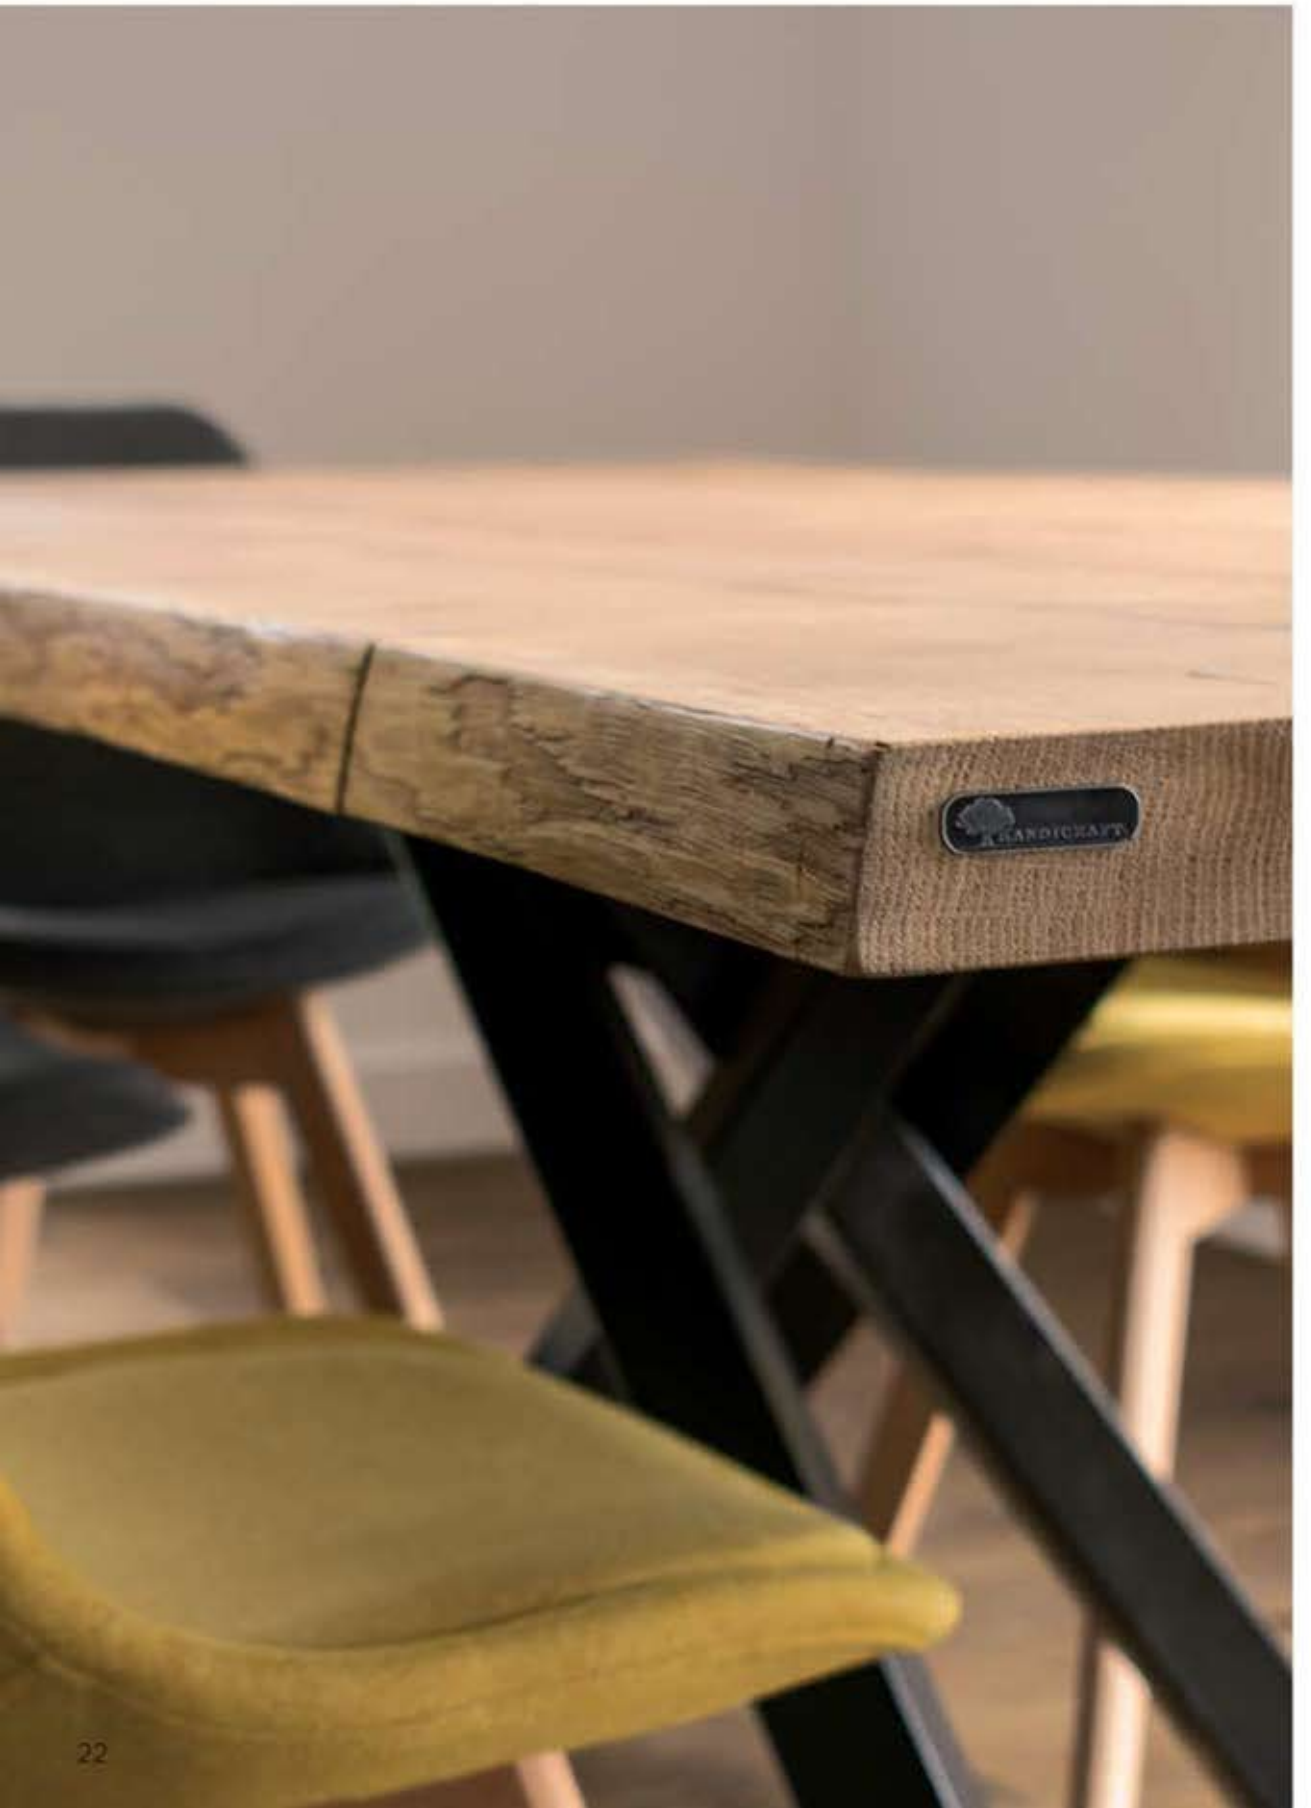
Multitasking
invisibly larger



MULTITASKING a significant advantage of such a solution is having the usable floor area larger. The unusual unfolding of the table means that we do not have to observe the connections every day. Enlarging the table to the full size is very easy to assemble. The possibility to choose both straight and natural edges is also one of the pluses of this kind of table. Under the surface of the table there are mounted two invisible slides for everyday use which should be pulled out with additional part attached when one wants to unfold the table. The biggest advantage of such solution is saveing usable floor area. Thanks to technology we use the connecting part is invisible when not in use and simple to assamble. As all our tabletops are bespoke you can decide wether you like the live edge or straight edge better. Under the surface of the table there are mounted two slides which should be pulled out with the additional part when somebody wants to unfold the table.

MONOLITH
supreme

Big size

Monolith tables - A modern solid in traditional roots. Monoliths are always created of one type of wood. The original material (tree) for these types of tables must be unique and of con-siderable sizes. These tress have an incredible value for us that is why we make an effort to present their history preserving even the smallest symbols such as all kinds of cracks, growthsand knots. No other similar exhibit exists. Each one of it is unusual and unique.

The organization of the work space is extremely important. Its functionality translates to a large effectiveness of work. Workspace is not only original design but also comfort and atmosphere that improves concentration.
The office is often a place where clients or potential employees meet. That is why it is so important to have that space representative and consistent with the company's image.

Restaurant & Hotel

A restaurant is not only a place where we come to eat but also to meet and spend a nice time.
Furniture does not have to be elegant but functional and durable. Our company always aspires to combine these two features. The original look combined with good cuisine means that customers are enjoyed to come back.

The organization of the work space is extremely important. Its functionality translates to a large effectiveness of work. Workspace is not only original design but also comfort and atmosphere that improves concentration.

A coffee table is undoubtedly a piece of furniture that is necessary in any interior. Seemingly small and inconspicuous, it has many advantages, not only in practical but also in visual terms. It is a decoration and complement to the arrangement of the living room.

Your color design

Many of us ordering a new item for our apartment do not want it to differ in colour from the rest of the decor. We offer a wide range of colours that is why we can adjust the colour of a new product to already existed items.
